# LOCAL GOVERNMENT

## SOUND & VISION

Redfish Technologies is a proud supporter of local government. We are specialist integrator and consultant of CCTV systems and technology for the local government sector.

Our knowledge and experience is based upon a detailed understanding of local government policies, procedures and provide systems and solutions to meet those exacting standards.

Redfish Technologies is a Western Australian Local Government Association (WALGA) Preferred Supplier for the following:

### ICT and Related Services - Contract No. C016/14

- Audio Visual Equipment and Fitout
- Consultancy - Technical

### Security Systems and Services - Contract No. C018\_13

- Supply, Install and Servicing of CCTV Hardware, Systems and Networks
- Security Consultancy Services

**Installed Sound and Vision** is a core competence of Redfish Technologies. Our services and technologies are based around having professional, quality and mission critical solutions working within any local government building or facility.

Redfish Technologies is a true systems integrator, looking for new technologies and systems that will assist your organisation to have an audio visual solution that meets your outcomes and requirements. Furthermore we strive to ensure whatever solution is provided is future proof and can integrate with new technologies later on.

We provide a range of AV services:

- Consultancy and Design Services
- Review and Refresh of Existing Venues
- Acoustic Room Design & Speech Intelligibility Testing (STI)
- Tender/Bid Writing and Tender/Bid Evaluation
- Build and Implementation Services
- Integration and Support of AV Solutions
- Specialist Chamber and Meeting Room Design and Construct
- Multi Year Maintenance Services

**CCTV** is becoming more and more prevalent in our daily life, we see it everywhere. However not all CCTV systems are the same. It all starts with ensuring your systems meets the outcomes expected of it, and ensuring your expectation are met, or set, to what a systems is capable of producing.

Some of the specialist CCTV service we offer are:

- Outcomes driven design and implementation.
- CCTV consultancy.
- Supply and installation of leading CCTV systems
- Design tools providing detailed outlines of your CCTV system.
- Support and maintenance of existing or new CCTV systems.
- On-site inspection and evaluation of requirements.

# OUR SERVICES

Redfish supply conference and discussion systems throughout the local government sector, from portable wireless systems for regional meetings and multi-use rooms, to fully installed systems in function rooms and council chambers. Every system is designed to suit each customer's specific needs.

Conference and discussion systems provide an individual microphone and loudspeaker to each delegate ensuring everybody taking part in a meeting is clearly heard. They add structure to a meeting, promoting interactive discussions while allowing the chair to control the flow of the meeting. As each delegate unit has a loudspeaker and microphone, clear and even amplification is achieved around the room. Microphones illuminate around the top of each microphone when in use, so other delegates can clearly identify who is speaking.

Conference discussion systems are much more than speech reinforcement systems. They can be used to control delegates speaking time, voting, camera control and provide audio to record the meeting.

## DISCUSSION SYSTEMS

## VISUAL SOLUTION

A Council Chamber is, by nature, a place of information sharing and discussion amongst people. As such, the environment should be one that fosters clear communication on every level, from the design of the Chambers itself to the clarity and quality of the AV system eventually deployed.

Redfish Technologies incorporate visual technology to encourage open government and information sharing with all participants within the room. Our solutions provide information sharing across multiple screens from multiple vision sources. We provide a specialised design and integration service for these sophisticated yet easy-to-use and cost-effective visual systems. These visual display systems help address the needs of Council, promoting open and clear communication.

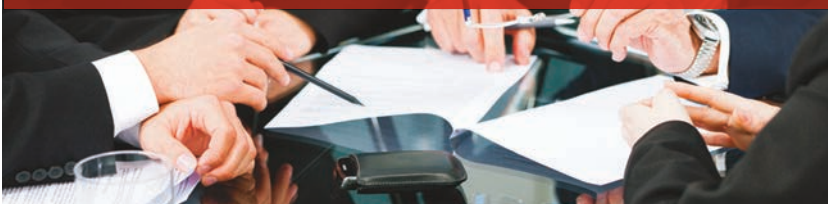

Redfish Technologies has experience in all major brands of digital recording software for courts, councils, parliament and law enforcement. There are many levels of digital recording products, we specialise in solutions that enable the recording to be recorded accurately and efficiently.

This technology is core to the capture of the audio recording and its transformation to the written record, its vital you get it right. As a professional systems integrator we are aware of all types of recording systems and specifically the right solution based upon your organisation requirements.

## DIGITAL RECORDING

## CONSULTANCY & DESIGN

Redfish Technologies is a specialised provider of evidential and audio visual solutions for integrated local government technology. We are an Australian company. Redfish consults, designs, installs and commissions these advanced technologies rooms and systems. In particular we provide detailed design and consulting services for these solutions as contracted non exclusive service at the start of any project.
